

Kakuro – 6 Printable Puzzles

Rules: write a digit 1-9 in every white square. Each clue is a sum: the number in the top-right of a clue square is for the run going ACROSS, the number in the bottom-left for the run going DOWN. No digit may repeat inside one run. Every puzzle has exactly one solution (computer-checked).
Tip: start with "magic" sums - $3 = 1+2$, $4 = 1+3$, $16 = 7+9$, $17 = 8+9$ (two squares). Answers: last page.

Cheat sheet: sums with only ONE possible combo

2 squares: $3 = 1+2$ $4 = 1+3$ $16 = 7+9$ $17 = 8+9$

3 squares: $6 = 1+2+3$ $7 = 1+2+4$ $23 = 6+8+9$ $24 = 7+8+9$

4 squares: $10 = 1+2+3+4$ $11 = 1+2+3+5$ $29 = 5+7+8+9$ $30 = 6+7+8+9$

5 squares: $15 = 1+2+3+4+5$ $16 = 1+2+3+4+6$ $34 = 4+6+7+8+9$ $35 = 5+6+7+8+9$

Also: 9 squares always = 45 (all digits 1-9). Cross out digits a run cannot use, then look where two runs cross.
Example: a 3-square run of 23 must use 6, 8 and 9 - so no 7 and no small digits there.
